

Basic Employee Orientation Checklist

The new employee orientation checklist is to be completed before an employee starts working directly with children. This checklist must be completed on all employees to meet level 2 of the Quality Rating System.

As the supervisor and employee go through the checklist, each major component should be checked off to indicate it has been presented to the new employee. The employee and supervisor sign the form at the end. The original is filed in the employee's file and the employee receives a copy.

It is understood this is a very general review of all issues detailed with extensive training conducted later once the employee is on the job. An example includes first aid/CPR training. The supervisor needs to provide general information about what to do if a child is injured but the employee will need the first aid/CPR training to be adequately prepared to deal with illness or injury. The supervisor needs to acquaint each new employee with mandatory child abuse reporting guidelines but this does not take the place of the required 2-hour detailed training.

Reference is made to Iowa Code Chapter 109 – Child Care Centers when specific information should be included as part of the orientation or materials provided.

Centers may add additional information to the checklist that is specific to their facility or organization.

Basic Employee Orientation Checklist Prior to Beginning Work
